bunyod-panjiyev.vercel.app · linkedin.com/in/bunyod-panjiyev

Final-year law student specialising in business law, currently interning at the Interdistrict Economic Court of Tashkent. Internship experience across the economic, criminal and administrative branches of the Uzbek justice system. I also build software tools for legal research and compliance. Seeking a legal internship in commercial and contract work.

LEGAL EXPERIENCE

Legal Intern · Interdistrict Economic Court of Tashkent 2026 – present

- Work with economic evidence and procedural requirements under the Economic Procedure Code.
- Assist in preparing case files: document inventories, page numbering, tables of contents and assembling documents into the file.

Legal Intern · Criminal Court of Shaykhontohur District Jun 2025

- Assisted in reviewing criminal case files; observed evidentiary standards, burden of proof and judicial reasoning at trial.

Legal Intern · Almazar District Department of Internal Affairs Jun 2024

- Processed administrative offence files and preliminary inquiries, checking compliance with procedural requirements and safeguards for citizens' rights.

EDUCATION

Bachelor of Laws (LL.B), Business Law 2023 – 2027

National University of Uzbekistan named after Mirzo Ulugbek, Tashkent · expected graduation 2027

LEGAL KNOWLEDGE AND SKILLS

Areas of law: contract law · corporate liability · consumer protection · economic procedure

Skills: legal research and analysis · legal document review · contract drafting · regulatory compliance · due diligence

Languages: Uzbek — native · English — B2 · Russian — A2 (actively improving; reading legal texts in Russian)

LEGALTECH PROJECTS

Civil Code Research Assistant (AI-based) 2026

Built in Python

- Answers legal questions on the Civil Code of Uzbekistan (approx. 1,200 articles) and cites the specific articles each answer relies on.
- Correctly reads and cites amended and inserted articles (e.g. Article 26¹, 173⁷).
- Calculates contractual penalties automatically.

Employment Fraud Detection Tool (consumer protection) 2026

Built in Python, using machine learning

- Flags likely fraudulent employment offers using legal indicators of deceptive commercial practice: missing company disclosures, misleading claims and aggressive formatting.
- In testing, about 92% of flagged cases were genuinely fraudulent, and the tool caught roughly 3 in 4 fraudulent cases.
- Calibrated to protect legitimate businesses from unfounded allegations: wrongly flagged cases reduced from 646 to 11.

TRAINING AND OTHER EXPERIENCE

AI / ML Trainee · IT Park Uzbekistan, in partnership with the World Bank Apr – Aug 2026

- Selected for a hands-on programme in artificial intelligence and machine learning.

Participant · Founders Camp (Bostonliq), Youth Union of Uzbekistan Aug 2026

- Selected for a one-week startup incubator; presented my LegalTech product “Bper” to mentors and fellow participants.
